#### Introduction

English is a foreign language but universally accepted as it is the most popular and internationally used language both for written and oral communication.

We learn a language to communicate. Language is used to express themselves, to interact with others, to gain information (academic and otherwise), and to learn about the world around them.

Language learning is most effective when it takes place through meaningful, interactive tasks. Language learners will thus learn most when they are engaged in meaningful, purposeful activities of social and cognitive nature in the context of the classroom (content-based instruction) and outside it (social settings).

Language skills are interdependent. Listening, speaking, reading, and writing skills are interdependent and one skill often activates the other skills for the achievement of effective communication.

## **Mission**

The Mission of OOS Sharjah is to prepare each student for a future of life-long learning. We believe that:

- All members of the learning community are valued and respected
- A work environment must encourage and support trust, mutual respect, open communications, and risk-taking
- Processes which allow for continuous improvement and problem-solving are essential.
- The education of all members of the learning community is a shared responsibility.

## **Vision**

The Vision of the school is to be the first choice for education by:

- Producing individuals who have the skills, ability, and attitudes to succeed as productive citizens and develop a mindset of lifetime learning
- Demonstrating high standards and expectations in education and co-curricular activities.
- Maximizing the utilization of school resources
- Fostering goals and values that will be embraced by those whom the school division touches
- Recognizing superior performance

## **Vision for the Primary**

Creating an effective learning environment that is conducive to independent thinking, where students are constantly challenged by teachers as well as their peers, where teachers are facilitators of learning opportunities for students and where the community is involved in the learning process.

## **FEATURES OF THE CURRICULUM**

The curriculum for the English language attempts to develop the use of English for four major purposes: communication, writing, reading and listening. We believe that the most effective way to achieve these purposes is through the adoption of a thematic, integrated, content-based approach to teaching and learning. The same concepts and skills will be taught at various levels across the grades. The curriculum aims to provide engaging experiences for children throughout the grades so that they can read, write and speak fluently, communicating their ideas and emotions to others.

### **Objectives:**

To provide a language-rich environment that promotes a culture of reading and writing.

- To develop in pupils an interest in and a love of books and literature that will not only support their learning across the curriculum but also enrich their lives.
- To teach children the craft of writing to develop in children the confidence and skills to write well for a range of purposes and audiences.
- Teach the basics – grammar, spelling, handwriting and punctuation.
- To foster in pupils the confidence, desire and ability to express their views and opinions both orally and in writing.
- To value and celebrate diversity in culture and language.

## **Skills developed in the Curriculum**

### **❖ Listening Skills**

Listening is the ability to accurately receive and interpret messages in the communication process. Listening is key to all effective communication. Listening requires focus and concentrated effort. It means paying attention not only to the story but how it is told, the use of language and voice. It means being aware of both verbal and nonverbal messages. Your ability to

listen effectively depends on the degree to which you perceive and understand these messages.

### ❖ **Speaking Skills**

Students must use talk to explore, extend, clarify, and reflect on their thoughts, feelings and experiences. Students should have opportunities to use talk to communicate and understand information and to respond personally and critically. Students should interact with sensitivity and respect, considering the situation, audience and purpose.

### ❖ **Reading Skills**

A child's reading skills are important to their success in school as they will allow them to access the breadth of the curriculum and improve their communication and language skills. In addition, reading can be a fun and imaginative time for children, which opens doors to all kinds of new worlds for them.

### ❖ **Writing Skills**

Writing skills are an important part of communication. Good writing skills allow you to communicate your message with clarity and ease to a far larger audience. Writing has a unique position in language teaching since its acquisition involves practice and knowledge of the other three skills, listening, speaking and reading. Creative writing tends to develop the self-confidence and self-esteem of the learners.

### ❖ **Literacy Skills**

The literary analysis begins with learning and applying key literary elements such as characterization, point of view, theme, symbol, conflict, setting, and foreshadowing. Children read stories from prescribed texts and are encouraged to deconstruct, analyse, justify, interpret, integrate, and connect information.
